Bengaluru, India | +91-9916191965 | mohtashimjama009@gmail.com | linkedin.com/in/mohtashimjama009 | github.com/mohtashim009

Professional Summary

AI & Machine Learning Engineer and Full-Stack Developer with hands-on internship experience shipping production-grade applications across Generative AI, Computer Vision, and web/mobile platforms. Skilled in building AI agents and GenAI-powered pipelines (Gemini, Mastra AI) integrated with React/Next.js and Flask, alongside REST API design and native Android development (Kotlin, Jetpack Compose). Strong software engineering fundamentals with a track record of shipping full-stack, mobile, and computer vision solutions end-to-end.

Technical Skills

- **Languages:** Python, Kotlin, TypeScript, JavaScript, HTML
- **AI/ML & Generative AI:** Machine Learning, Deep Learning, Natural Language Processing, TensorFlow, Keras, NumPy, Gemini API, Mastra AI Framework, TF-IDF, Perplexity AI API, SerpAPI
- **Full-Stack Development:** Next.js, React, Node.js, Flask, REST API Design, Tailwind CSS
- **Mobile Development:** Jetpack Compose, MVVM Architecture, Room, Hilt (Dependency Injection), Coroutines & Flow
- **Tools & Platforms:** Git & Version Control, GitHub, Vercel (Cloud Deployment), Docker (Basic), Android Studio, MPAndroidChart

Experience

Android Developer Intern — MindMatrix (VTU-Affiliated Virtual Internship Program) Feb 2026 – May 2026

Project: *KreedaPrerana* — AI-Assisted Sports Talent Scouting App | [\[GitHub\]](#)

- Completed a VTU-curriculum virtual internship, "Android App Development using Generative AI," and architected *KreedaPrerana*, a native Android app (Kotlin, Jetpack Compose, MVVM) for sports talent scouting, using Android Studio, Google Cloud Labs, and Google AI Studio.
- Designed an offline-first data layer using Room database and Hilt dependency injection, modeling relational entities for athletes, trials, benchmarks, and badges with cascading foreign keys.
- Built a batch trial-entry workflow with a custom nanosecond-precision chronometer and a rule-based badge evaluation engine benchmarking live results against performance datasets.
- Developed a dynamic leaderboard and performance-trend visualizations (MPAndroidChart, Kotlin Flow) with an AI-insights module architected for pluggable LLM integration (Gemini); rated "Excellent" by internship coordinators.

Projects

Intelligent Research Assistant with Mastra AI | [\[GitHub\]](#)

- Architected an agent-based research assistant using the Mastra AI framework and a Next.js (TypeScript) frontend to automate academic literature reviews.
- Implemented a hybrid search strategy integrating Perplexity AI (web search) and SerpAPI (Google Scholar) to enable comprehensive data retrieval.
- Engineered a summarization pipeline with the Gemini API to process source articles into concise, abstract-style reports with structured citations.
- Applied TF-IDF and metadata scoring to normalize and rank articles, reducing manual research time.

Education

B.E., Artificial Intelligence & Machine Learning

2022 – 2026

KNS Institute of Technology, Bengaluru

- CGPA: 8.34/10.0
- Relevant Coursework: Data Structures & Algorithms, Deep Learning, Natural Language Processing, Database Management Systems

Certifications

- Introduction to Machine Learning | NPTEL - IIT Madras
- Cloud Computing | NPTEL - IIT Kharagpur
- AI: Search Methods for Problem Solving | VTU Centre for Online Education (IIT Madras)
- Data Analytics with Python | VTU Centre for Online Education
- GPU Architectures and Programming | VTU Centre for Online Education
